

The Earigator

PRECISION SUCTION/IRRIGATION IN ONE ERGONOMIC HAND PIECE

“In my practice, the OtoPet Earigator makes ear cleaning quick, easy, and profitable. I can flush and suction the entire ear including the horizontal canal in just a few minutes with the Earigator and a 5Fr catheter inserted through the OtoPet Video Otoscope probe. It can also be used with larger catheters without any other special equipment for cleaning larger pieces of debris from the ear canal.”

-Louis Gotthelf, DVM

No practice should be without the Earigator!

This unique device works standalone for precise suction and irrigation. No other equipment is necessary.

Separate controls provide flexibility for suction and irrigation.

Combine with an OtoPet-USA or similar video otoscope for optimum use. Sold separately or packaged with the OtoPet-USA VetScope System.

(formerly MedRx Veterinary)
